VOLUME 40, 1987 AUTHOR AND SUBJECT INDEX

LIFE SCIENCES EDITORIAL POLICY

Modern pharmacology is an integrated discipline encompassing aspects of a variety of basic science technologies. Accordingly, there is an increasing trend for investigators in pharmacology to cross the boundaries of separate and distinct disciplines. The basic unity of the life sciences has created the need for a journal which expeditiously publishes new and significant information in pharmacology.

When *LIFE SCIENCES* was first published it was the hope that scientific reports would be published rapidly, within weeks of acceptance. *LIFE SCIENCES* has adhered to its original intention by instituting procedural changes which have accomplished this goal.

LIFE SCIENCES is an international weekly journal which accepts papers concerning the pharmacological aspects of biochemistry, chemistry, endocrinology, immunology, medicinal chemistry, microbiology, molecular biology, pathology, physiology and toxicology. The following types of manuscripts are reviewed on the basis of their suitability, scientific merit and the need for rapid publication:

1. New scientific information.
2. Minireviews on selected aspects of a scientific field undergoing rapid change.
3. Brief conceptual papers based on original and/or literature data.
4. Relevant clinical discoveries.
5. Collections of selected papers on current concepts in a particular field.
6. Occasional symposia papers.
